

# PLASTIC FILM MASK

REUSABLE WITH AN ELASTIC BAND

(washable in high temperature and sterilizable / retortable)

## Art. 0001 - Plastic film mask

- the mask allows for breathing freely, glasses worn with it **do not steam up**,
- it protects against **microorganisms and viruses**,
- the silicone rubber does not irritate the head **the memory of the stretch** perfectly adjusts to the head anatomy,
- the mask is **resistant to high temperature up to 90° and alcohol solutions**, which allows it to be disinfected by simple wiping,
- the lightness of the mask makes us **forget about its existence**,
- the transparency of the mask allows us to show **personal charm**, hidden by the pandemic,
- the mask is stiff and weighs **only 2 grams**.

**Size** - universal

**Color:** ☐ colorless/transparent

## PET film - multi-layer polyester film

The mask material is resistant to weak acids, alkaline solutions, oils and fats. The advantage of the film is its shape memory, thanks to which it adapts to each user's face.

The film complies with the European Union regulations on plastic materials and products (declaration of conformity 1/2020 of the film manufacturer).

**The mask and its pattern are protected by an application to the Patent Office of the Republic of Poland (Wp. 28909).**
